Skills

- HTML
- CSS
- Bootstrap
- JavaScript
- PHP
- Laravel

Projects **Employee Attendance Management System**
Technologies: PHP, Laravel

- Developed a role-based attendance management system with separate modules for Admin and User.
- Integrated employee attendance tracking with accurate date and time management.
- Implemented leave request handling and automated leave days calculation.
- Ensured secure authentication and smooth user experience using Laravel.

Product Management System – Fruits
Technologies Used: HTML, CSS, Bootstrap, PHP, MySQL

Description:
Developed a web-based Product Management System for Fruits with full CRUD (Create, Read, Update, Delete) operations. Designed responsive and user-friendly interfaces using HTML, CSS, and Bootstrap. Implemented backend functionalities in PHP for efficient product management including adding,

updating, viewing, and deleting fruit records. Ensured data accuracy and system reliability through proper validation and optimized database handling.

Tourist Place Website

Technologies Used: HTML, CSS, Bootstrap, JavaScript

Description:
Designed and developed a responsive Tourist Place website to showcase popular travel destinations with detailed information, images, and interactive UI elements. Focused on creating an attractive, user-friendly frontend using HTML, CSS, Bootstrap, and JavaScript. The project highlights key tourist attractions, providing an engaging experience for users to explore various locations.
